Education

Luther College — Decorah, IA
Bachelor of Arts in Computer Science, minor in Data Science — *Aug. 2023 – May 2027*

Experience

Backend Team Lead Intern — Aug. 2026 – Oct. 2026
GBCS Group (SkyIT) — *Alberta, Canada*

- Lead a team of 7 backend interns: task assignment, daily stand-ups, and weekly progress reports to the CEO.
- Own backend code review: merged 40+ PRs and 6,000+ lines across tenant isolation, auth, and migrations.
- Introduced CI test gating and protected branching after repeated branch breakages; green builds now gate merges.

Backend Developer Intern — June 2026 – Aug. 2026
GBCS Group (SkyIT) — *Alberta, Canada*

- Scoped every Django ORM queryset to its tenant so no client sees another's rows; proved it with 12 tenant tests.
- Modelled Scope 1–4 emissions calculations for an enterprise GHG engine in a service layer, unit-tested per rule.
- Traced a silent deploy failure to a Django settings override, then documented the fix for new engineers.

Software Engineer Intern — Feb. 2026 – May 2026
Mayo Clinic — *Rochester, MN*

- Built a browser tool that strips patient identifiers from DICOM scans locally, so PHI never reaches a server.
- Implemented a 270-tag HIPAA de-identification engine with 3 rulesets, UID hashing, and output validation.
- Added a React assessment panel to OHIF, the open-source DICOM viewer, for structured radiology scoring.

Software Engineer Intern — July 2025 – Sep. 2025
Jaka Lounge Human Capital — *Belgrade, Serbia*

- Wrote Kotlin service and persistence code modelling candidate employment records for a verification platform.
- Built company-side endpoints for submitting and tracking verification requests against external data providers.

Software Engineer Intern — Apr. 2025 – June 2025
WEBX Team — *Belgrade, Serbia*

- Built Spring Boot endpoints backed by PostgreSQL for client-facing web applications.

Projects

Dormsy | *Next.js, TypeScript, Express.js, Supabase, PostgreSQL, Vercel, Railway* — Mar. 2026 – Present

- Launched and maintain a campus marketplace for Luther College students: deploys, support, and new features.
- Architected a 3-tier system with Next.js on Vercel, a dedicated Express REST API on Railway, and PostgreSQL.
- Integrated Supabase Realtime for live in-app chat with an email notification fallback for offline users.

Clinic Management Web App | *React, Node.js, Express, PostgreSQL* — June 2025 – July 2025

- Built a full-stack platform with JWT auth and role-based access control for 20+ clinic staff.
- Designed a normalized PostgreSQL schema for patients, appointments, and staff roles.
- Integrated Google Calendar API for scheduling and automated report generation, cutting report time by 70%.

Technical Skills

Languages: Python, JavaScript/TypeScript, Java, Kotlin, C/C++, SQL

Frameworks: React, Next.js, Node.js, Express, Django, Flask, FastAPI, Spring Boot

Testing & APIs: PyTest, JUnit, REST, OpenAI API

Databases: PostgreSQL, MySQL, MongoDB, Supabase

Tools & Cloud: Git, Docker, AWS, Azure, Vercel, Railway, Claude Code, Cursor, Jira, Slack
