EDUCATION

Luther College

Bachelor of Arts in Computer Science

Decorah, IA

Aug. 2023 – May 2027

EXPERIENCE

Backend Team Lead

GBCS Group (SkyIT)

Aug. 2026 – Present

Alberta, Canada

- Led a 7-engineer backend team: task assignment, daily stand-ups, weekly progress reports to the CEO
- Reviewed, approved, and merged a 1,500-line PR gating on tenant isolation, auth, and migrations
- Drove adoption of a CI test-gate and “green before merge” rule after repeated branch breakages

Backend Developer

June 2026 – Aug. 2026

- Built multi-tenant data isolation into a Django REST Framework API, proven by automated 2-tenant tests
- Built REST APIs for an enterprise GHG emissions engine (Scope 1–4) on a DTO–service architecture
- Diagnosed and fixed a production-blocking Django settings misconfiguration, unblocking the entire team

Software Engineer Intern

Mayo Clinic

Feb. 2026 – May 2026

Rochester, MN

- Built a browser-based DICOM PHI anonymizer applying 300+ de-identification rules per HIPAA standards
- Extended the open-source OHIF medical imaging viewer with a custom React radiology assessment panel
- Orchestrated a 5-service full-stack platform across Python, Node.js, and React with one-command scripts

Software Engineer Intern

Jaka Lounge Human Capital

July 2025 – Sep. 2025

Belgrade, Serbia

- Built backend development of a career verification platform, building database records in Kotlin
- Developed company management features and REST API integrations

Software Engineer Intern

WEBX Team

Apr. 2025 – June. 2025

Belgrade, Serbia

- Built RESTful APIs with Spring Boot and PostgreSQL, improving backend response times for client applications
- Deployed APIs via Docker in a staging environment, accelerating cross-team integration testing

PROJECTS

Dormsy | *Next.js, TypeScript, Express.js, Supabase, PostgreSQL, Vercel, Railway*

Mar. 2026 – Apr. 2026

- Built and launched a campus marketplace for students, live at Luther College on a custom domain
- Architected a 3-tier system with Next.js on Vercel, a dedicated Express REST API on Railway, and PostgreSQL
- Integrated Supabase Realtime for live in-app chat with an email notification fallback for offline users

Clinic Management Web App | *React, Node.js, Express, PostgreSQL*

June 2025 – July 2025

- Built a full-stack platform with JWT auth and role-based access control for 20+ clinic staff
- Designed a normalized PostgreSQL schema for patients, appointments, and staff roles
- Integrated Google Calendar API for scheduling and automated report generation, cutting report time by 70%

TECHNICAL SKILLS

Languages: Python, JavaScript, TypeScript, Java, Kotlin, C/C++, SQL, HTML/CSS

Frameworks: React, React Native, Node.js, Express, Django REST Framework, FastAPI, Spring Boot, Flask

Tools & Cloud: Git, Docker, Azure, AWS, Jira, Expo, VS Code

Databases & Libraries: PostgreSQL, MySQL, Supabase, OpenAI API, JUnit
